DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 16, 2002 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Rudy 3,685,176. Rudy '176 discloses all the limitations of the claims including the following: footwear for protecting a foot (Figure 1); a vamp of an upper extending from a toe region to an instep region and consisting of a single unit (vamp is upper 11); a liner 111 positioned beneath the instep portion and consisting of a single piece; an elastic instep guard 20 positioned between the instep portion and the liner to protect the metatarsal area of the user's foot; the instep guard including an elastic support having a plurality of hollow passages (see Figure 8, also see col. 4, lines 20-42); the guard extending from the toe to the instep region of the vamp (see Figure 8); the guard including a first sheet 100 and a plurality of members extending from the first sheet to define the plurality of hollow passages (that which forms the hollow chambers in Figure 8); the instep guard having a second sheet 101 connected to the first sheet by the support members (support members connect the sheets to form hollow tubes); the

plurality of passages 24-30 are defined by the first sheet, the second sheet and a plurality of curved support members; the hollow passages are filled with air; the hollow passages are elongated (see Figure 8); the cross-section of the hollow passages is ovoid (see Figure 8); the instep guard is made of resilient material (elastomeric sheet material); the instep guard is positioned on an underside of the instep portion of footwear (see Figures 1 and 8).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudy 3,685,176 in view of Johnsen 2,988,829. Rudy '176 discloses all the limitations of the claims as noted above except for the steel toe and the guard being in contact with the steel toe and the cross-section of the support members being different. Johnsen '829 teaches that a boot can contain a steel toe 21 and an instep protector 30 used in combination where the instep protector contacts the steel toe to provide continuous protection of the upper portion of a user's foot. Therefore, it would have been obvious, to one of ordinary skill in the art at the time the invention was made, to place a steel toe, such as that shown in Johnsen '829, in contact with the liner of Rudy '176 to aid in protecting the toe area of the shoe of Rudy '176 from heavy impacts. With respect to the limitation of the hollow tubes having at least two different cross-sections, this can clearly be seen in Rudy '176 as the cross section shown in Figure 5 are circular while the cross-section shown in Figure 6 are ovoid shaped.

Response to Arguments

6. Applicant's arguments with respect to claims 1-10 and 24 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers or other general questions should be directed to Tech Center 3700 Customer Service at (703) 306-5648, email CustomerService3700@uspto.gov.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony D Stashick whose telephone number is 703-308-3876. The examiner can normally be reached on Tuesday through Friday from 8:30 am until 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on 703-308-2672. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.

Other helpful telephone numbers are listed for applicant's benefit.
